

Humberto Wilfredo Henríquez Benítez

HH

Power Platform · Applications · Data · Automation

Senior Power Platform consultant and React developer. I connect processes, applications and data, with attention to integrations, validation and human oversight. Founder of Optimatiza.

Areas of collaboration

- Power Apps, Power Automate, Dataverse and Power BI.
- React applications, APIs and system integration.
- Document automation and scoped AI workflows.

Working arrangements

- Senior support for teams and consulting firms.
- Projects with agreed deliverables and acceptance criteria.
- Fully remote roles, discussed directly.

Three cases to review

[RELOJ](#) Synthetic browser demo: data freshness and publication policies. Public code.

[Oficina Viva](#) Own project: assignment, states and task review using AI roles.

[Capturista Digital](#) Own prototype: invoice extraction and XLSX entry. Demo with explicit limitations.

These are own projects and demonstrations. Their evidence describes the behaviour and limitations of each implementation; it does not establish client outcomes.

Remote coordination

San Salvador, El Salvador (UTC-6). For Spain and other countries, overlap, time commitment and channels are agreed before work starts. Spanish; basic English for reading technical documentation.

Starting agreements

Scope, responsibilities, system access, confidentiality, acceptance criteria and handover. Time commitment, start date and commercial terms are confirmed for each engagement.

Services through Optimatiza · Employment discussed directly with Humberto
